

MINI WIRELESS SEQUENCE LIGHTS MF – 01

The set of devices (4 lamps) is dedicated to temporary mark the most danger areas. Easy mount because of radio wireless transmission. The set can be install directly on road or on panels. Using high LED technology makes low power consumption and longer life of device. Because of easy mount and short time of installing it is a good idea for : police, fire brigade, ambulance service - to mark road accidents, fire etc. The set can be composed of warning lights type „Flash” LOF , L8G class or signaling devices type "ASP", L8H class.

Mini wireless sequence lights are compliance with: **PN-EN 12352**

Assignment:

MF – 01
