

ACTIVE ROAD MARKER -OA

Characteristic:

Elements like active road marker are dedicate to be mount on roads in the most danger areas for example: in front of sharp bend or road narrowing, pedestrian crossing, departure on motorways. High LED technology improve visibility. Devices are easy to install without using cable. OA – active road marker is powered with solar panel. Aluminium housing makes them resistant on detrimental effect of atmospheric conditions and external interference.

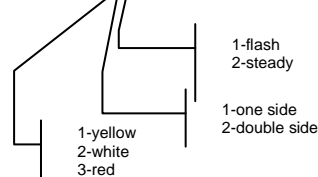

Technical data OA-01:

- automatic night operation
- carriageable 10 ton/m²
- aluminum housing
- powered with solar
- rechargeable Ni-MH
- dimensions:
132x122x20 mm

Assigning

OA – 01xxx

Possible variations.

OA-01111, OA-01112,
 OA-01211, OA-01212,
 OA-01221, OA-01311,
 OA-01312, OA-01321,
 OA-01121.

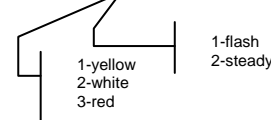

Technical data OA – 02:

- automatic night operation
- aluminum housing
- powered with solar
- rechargeable Ni-MH
- dimensions:
110x97x24,5 mm

Assigning

OA – 02xx

Possible variations.

OA-0211, OA-0221,
 OA-0231, OA-0232,
 OA-0212, OA-0222,

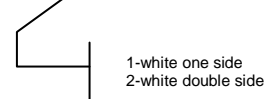

Technical data OA – 03:

- automatic night operation
- carriageable 10 ton/m²
- aluminum housing
- powered with solar
- rechargeable Ni-MH
- dimensions:
125x125x16 mm

Assigning

OA – 03x

Possible variations.

OA-031, OA-032,

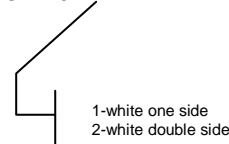

Technical data OA – 04:

- automatic night operation
- carriageable 30 ton/m²
- aluminum housing
- powered with solar
- rechargeable Ni-MH
- dimensions:
100x80x50 mm
140x50 mm
- mounts flush with the road surface

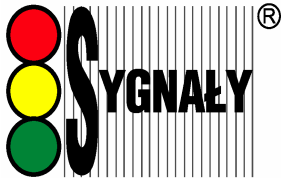

Assigning

OA – 04x

Possible variations.

OA-041, OA-042,

Technical data OA – 05:

- automatic night operation
- powered with solar
- rechargeable Ni-MH
- dimensions:
125x125x16 mm
- installed on guard rail

Assigning

OA – 05x

- 1-white
- 2-red
- 3-yellow

Possible variations.

OA-051, OA-052,
OA-053

Technical data OA – 06:

- automatic night operation
- carriageable 30 ton/m²
- aluminum housing
- powered with solar
- rechargeable Ni-MH
- dimensions:
160x57 mm
- mounts flush with the road surface
