

TRAFFIC LIGHT PHG

The Traffic light type PHG from many years helps to keep safety on Polish roads. Strong housing ensure mechanical damage and weather conditions resistance.

Technical data:

Whole the traffic light housing is made of very durable material – ABS and lens are from high-quality polycarbonate. Depending of order the light source can be a bulb or LED module. Moreover the traffic light can be sell as a single, double or triplechabers device. Lens diameter is: $\phi 200$ or $\phi 300$; The presentation of lens kinds are in an attachment no 1.
